TAP into Connected Feed Management

Modern feed management software tied directly to the mixer.

Manage Products
Manage ingredients, recipes and
premises for the entire herd.

[Learn More](#)

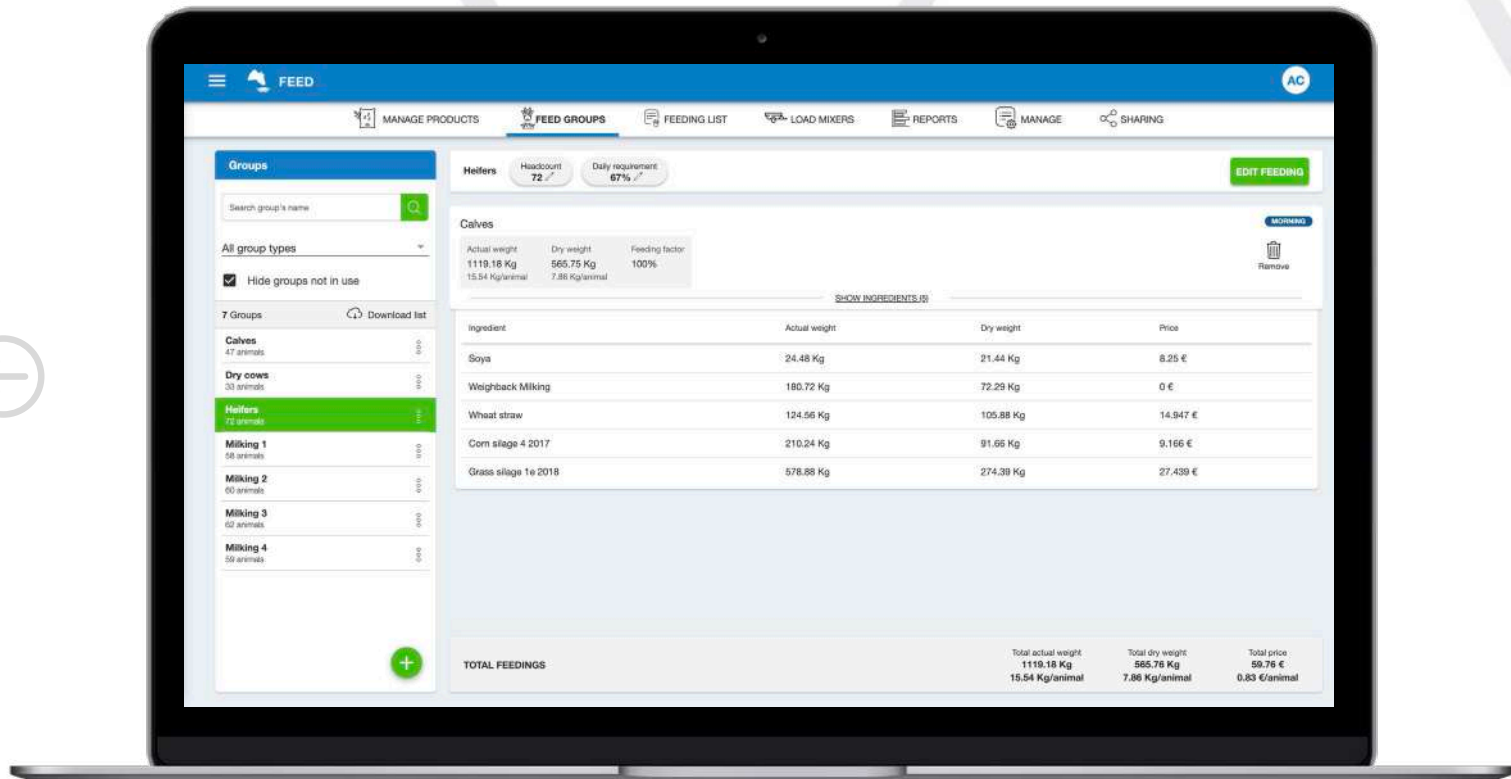

Manage ingredients

- Name / Type / Location / Dry matter %
- Price (Actual weight / Dry weight)

Manage recipes and premixes

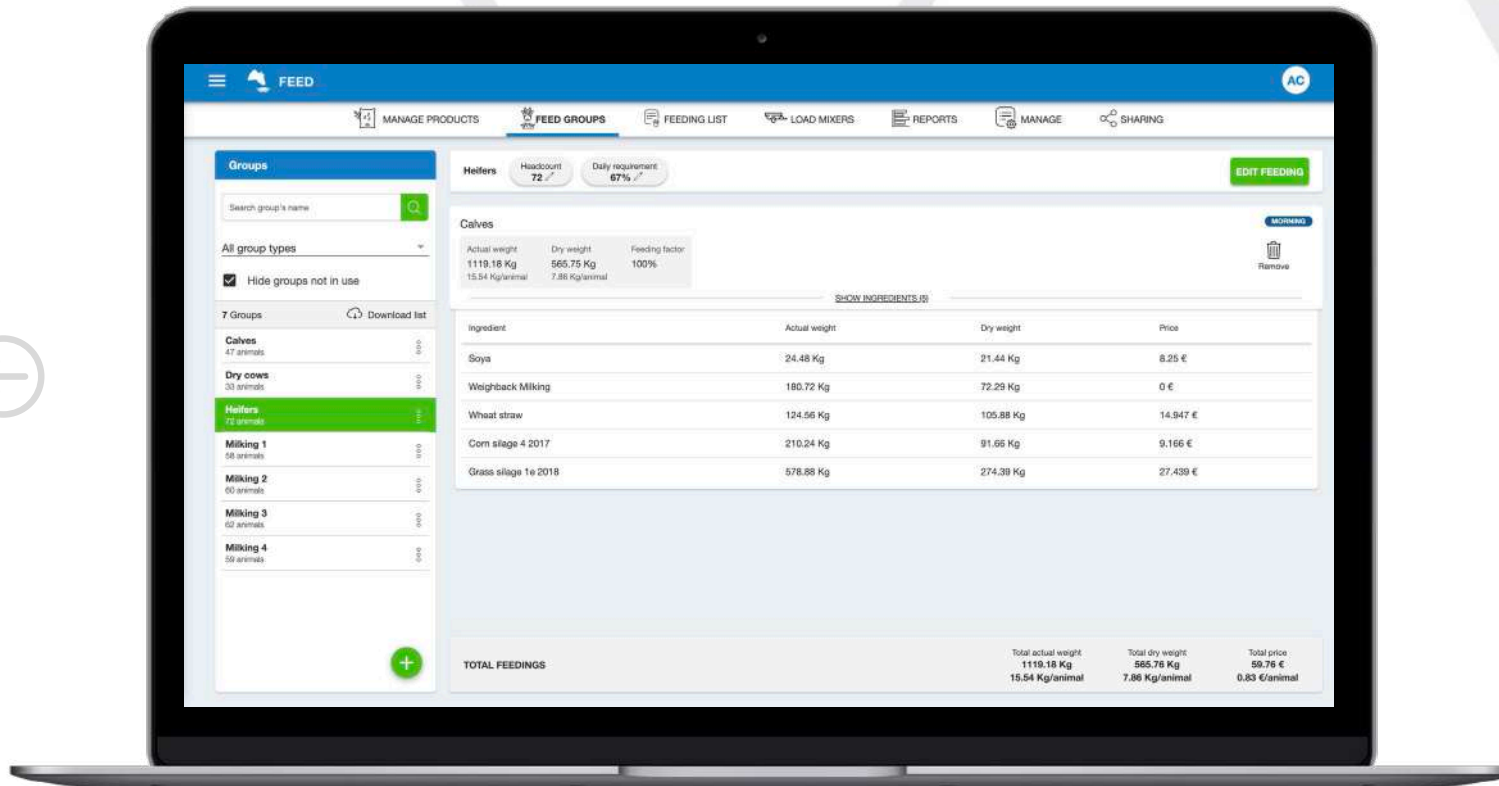

- Name / Density / Auto dry matter
- Ingredients / Actual load / Dry matter load / Load %
- Mixer commands in time or REVs
- Total amounts
- Easy to change loading order

Feed Groups

Manage feed groups, assign recipes and daily requirements.

[Learn More](#)

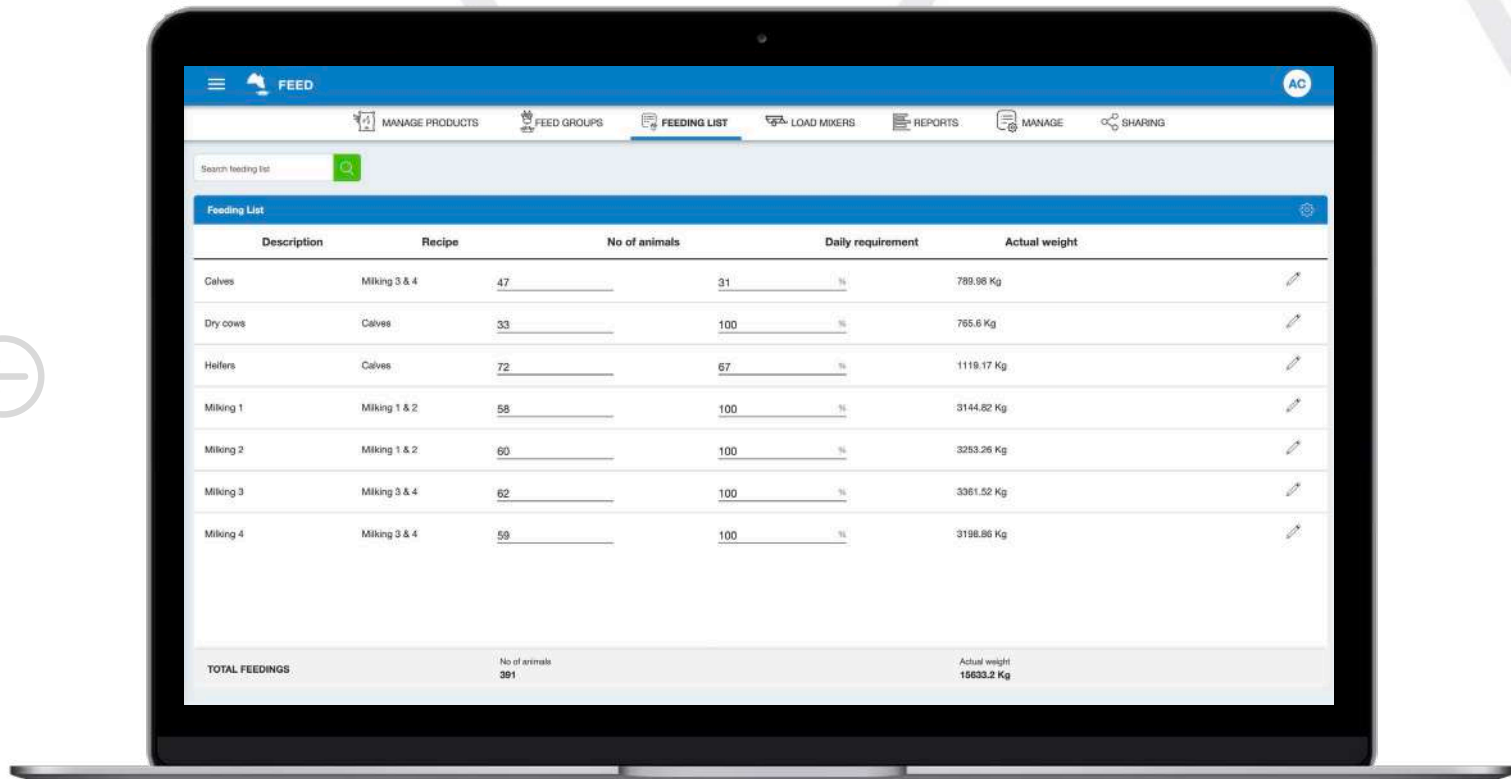

Organize groups

- Name / Type / Daily Requirement / Headcount

Define feeding periods

- Time / Actual weight / Dry weight / Feeding factor %

Assign recipes

Feeding Lists

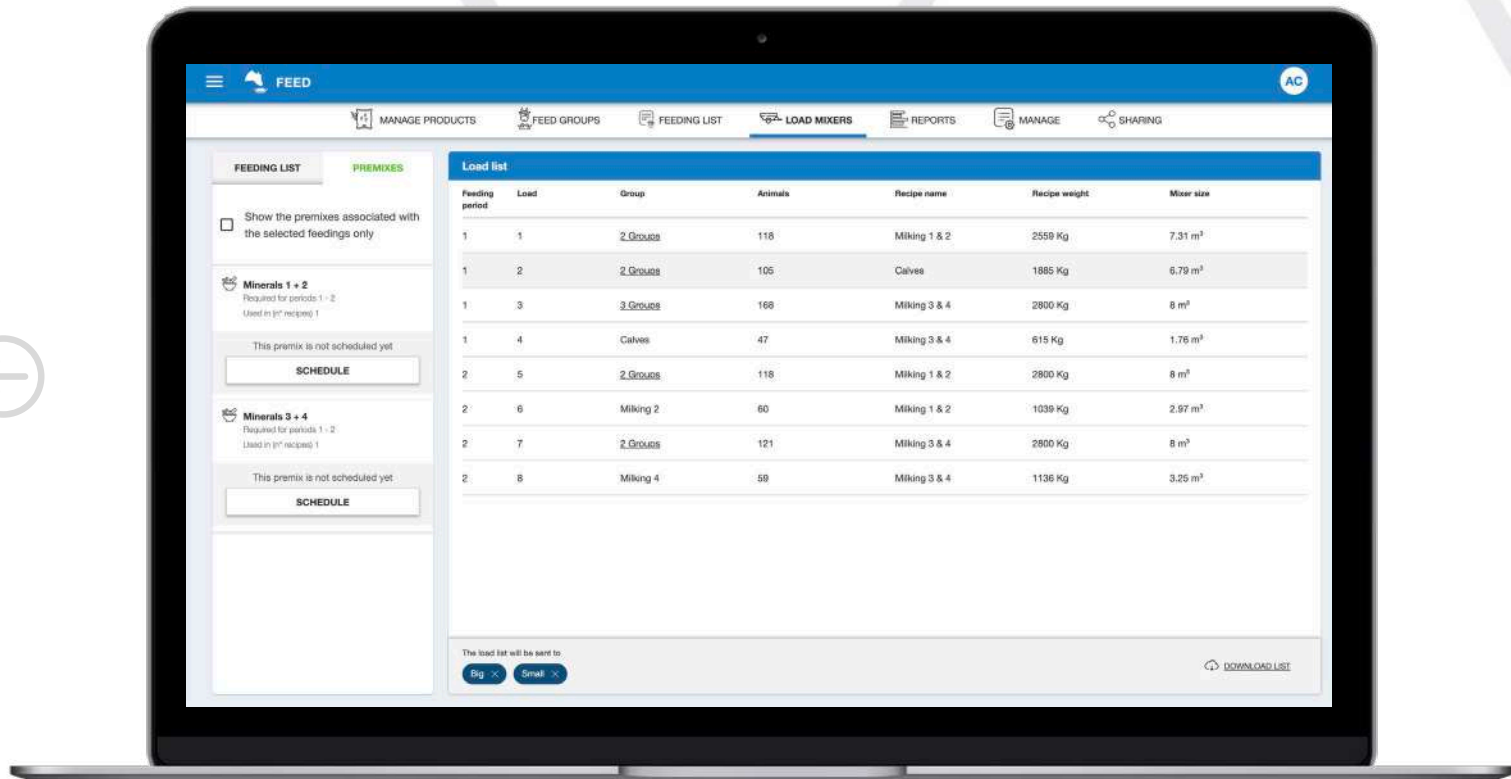

Manage feed groups in a clean table/list format.

[Learn More](#)

Description	Recipe	No of animals	Daily requirement	Actual weight
Calves	Milking 3 & 4	47	31 %	789.98 Kg
Dry cows	Calves	33	100 %	765.6 Kg
Heifers	Calves	72	67 %	1119.17 Kg
Milking 1	Milking 1 & 2	58	100 %	3144.82 Kg
Milking 2	Milking 1 & 2	60	100 %	3253.26 Kg
Milking 3	Milking 3 & 4	62	100 %	3361.52 Kg
Milking 4	Milking 3 & 4	59	100 %	3196.86 Kg
TOTAL FEEDINGS		No of animals 391		Actual weight 15633.2 Kg

Manage feeding lists

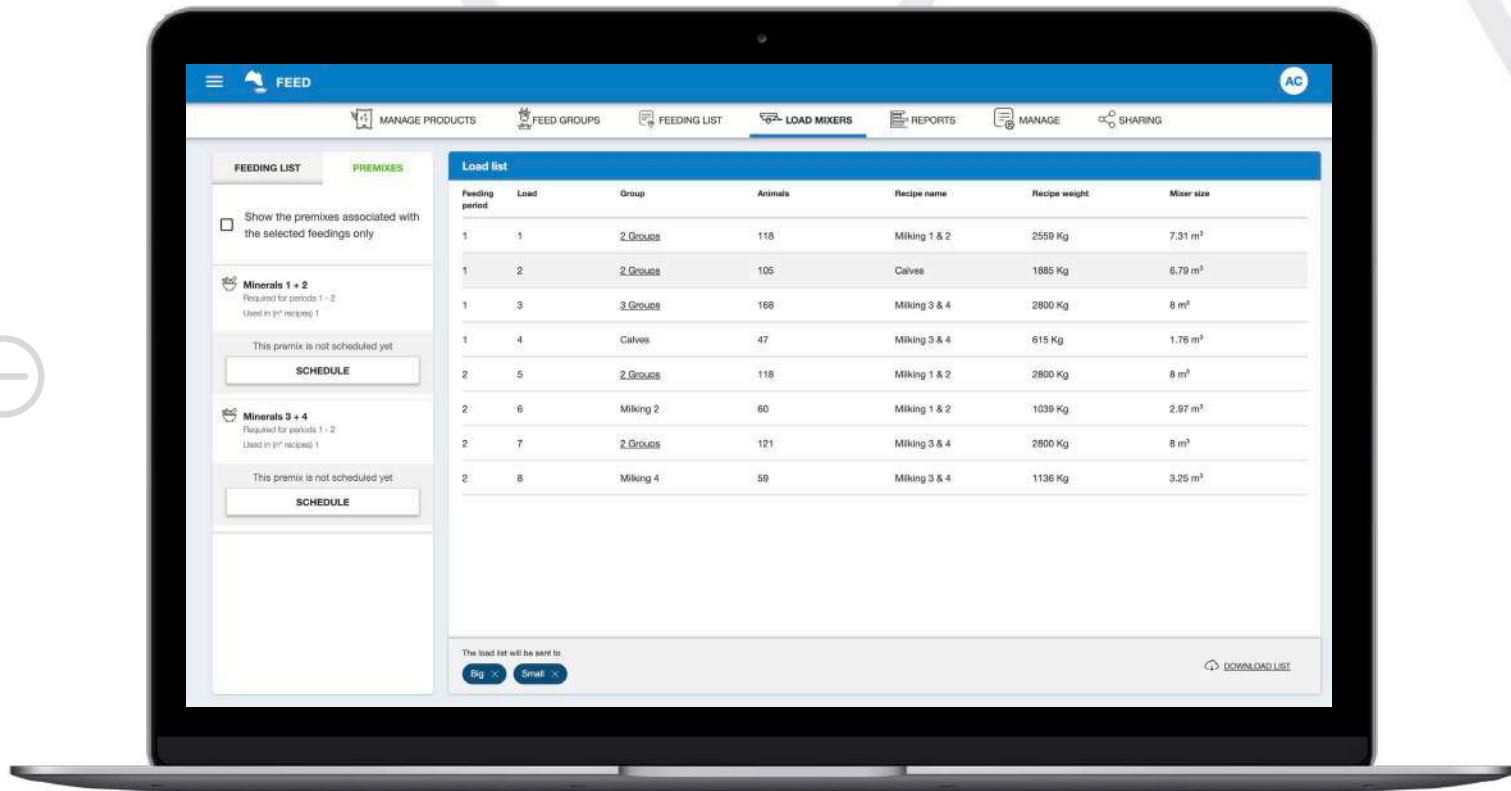

- Name / Description / Recipe
- # of animals
- Daily requirement
- Actual weight
- Total feedings (# of animals & actual weight)

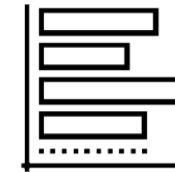

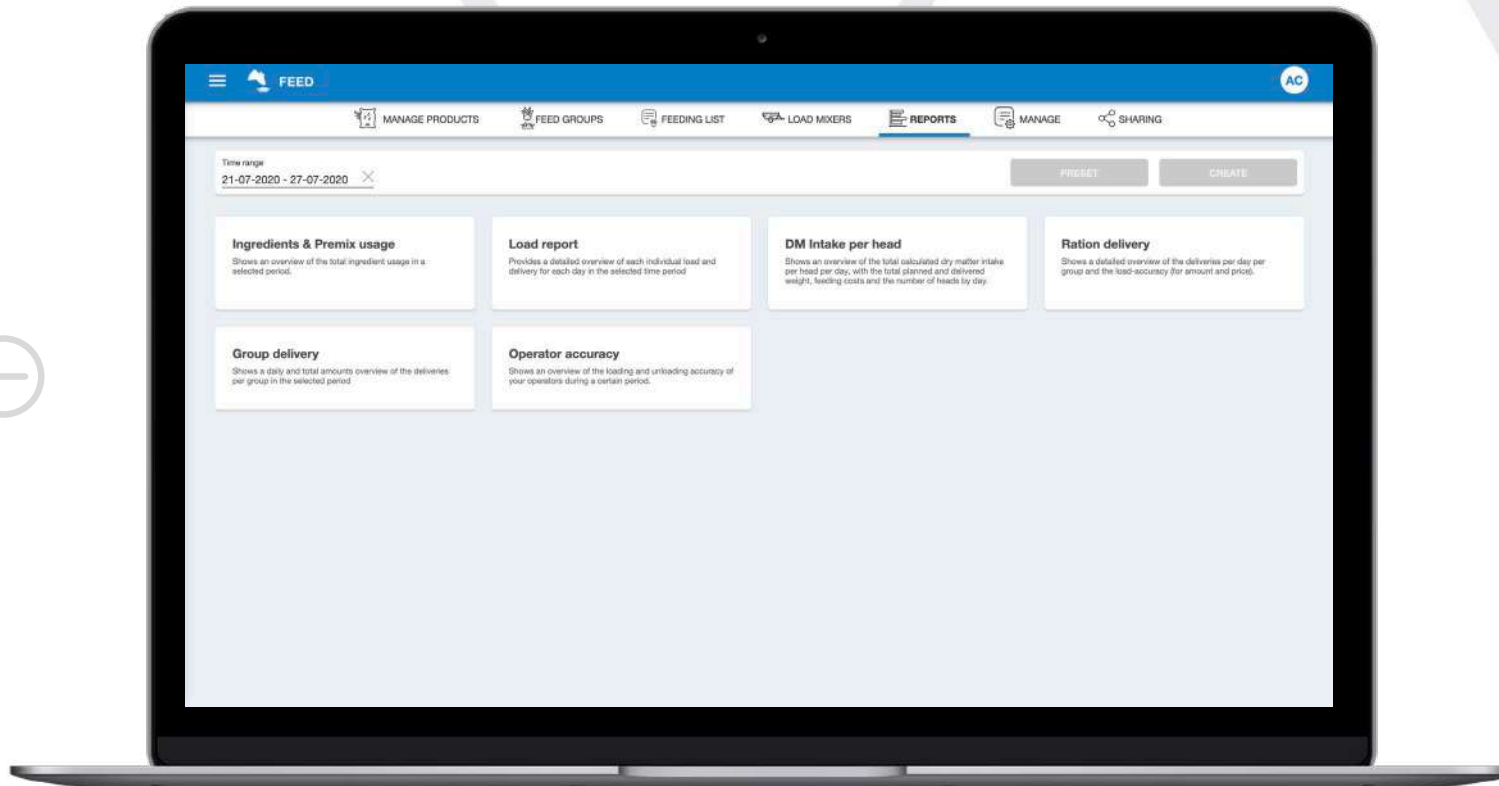

Load Mixers

Manage load intervals and lists.
Send loads directly to mixers.

[Learn More](#)

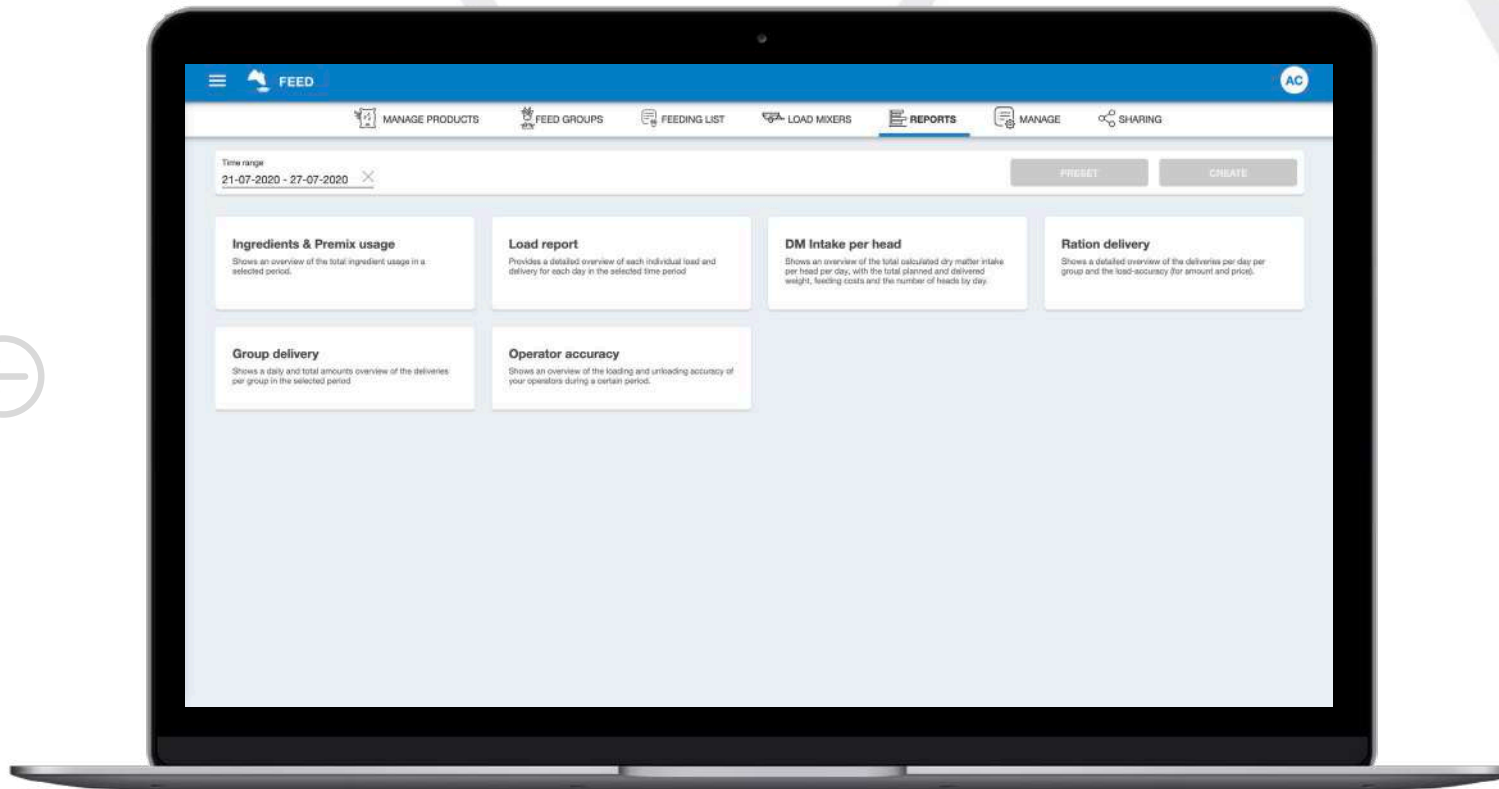

- Toggle feeding periods
- Send load lists directly to feed mixer
- Premix inclusion
- Quick download

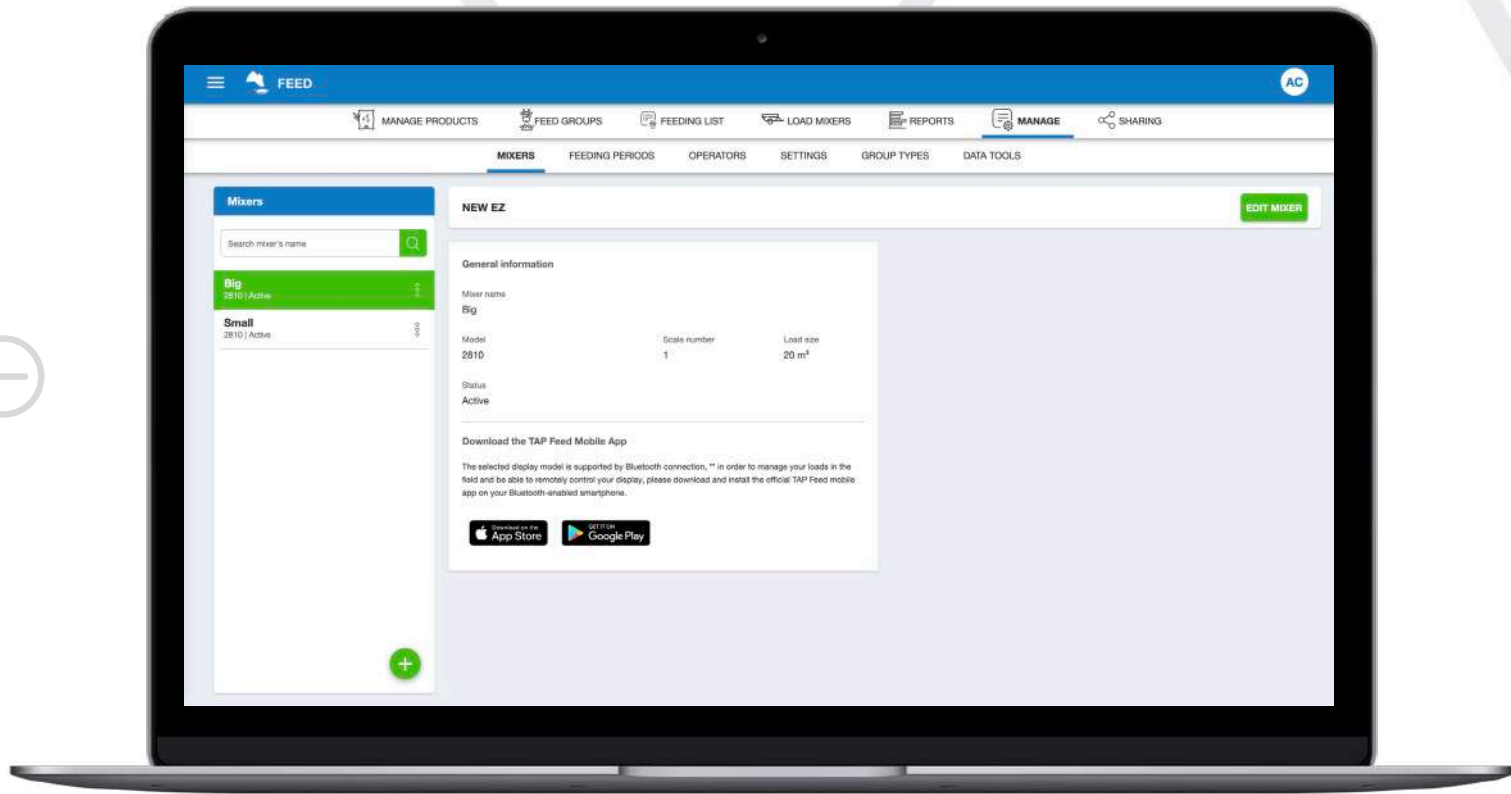

Reports

Easily view and export feed management reports for analysis and performance optimization.

[Learn More](#)

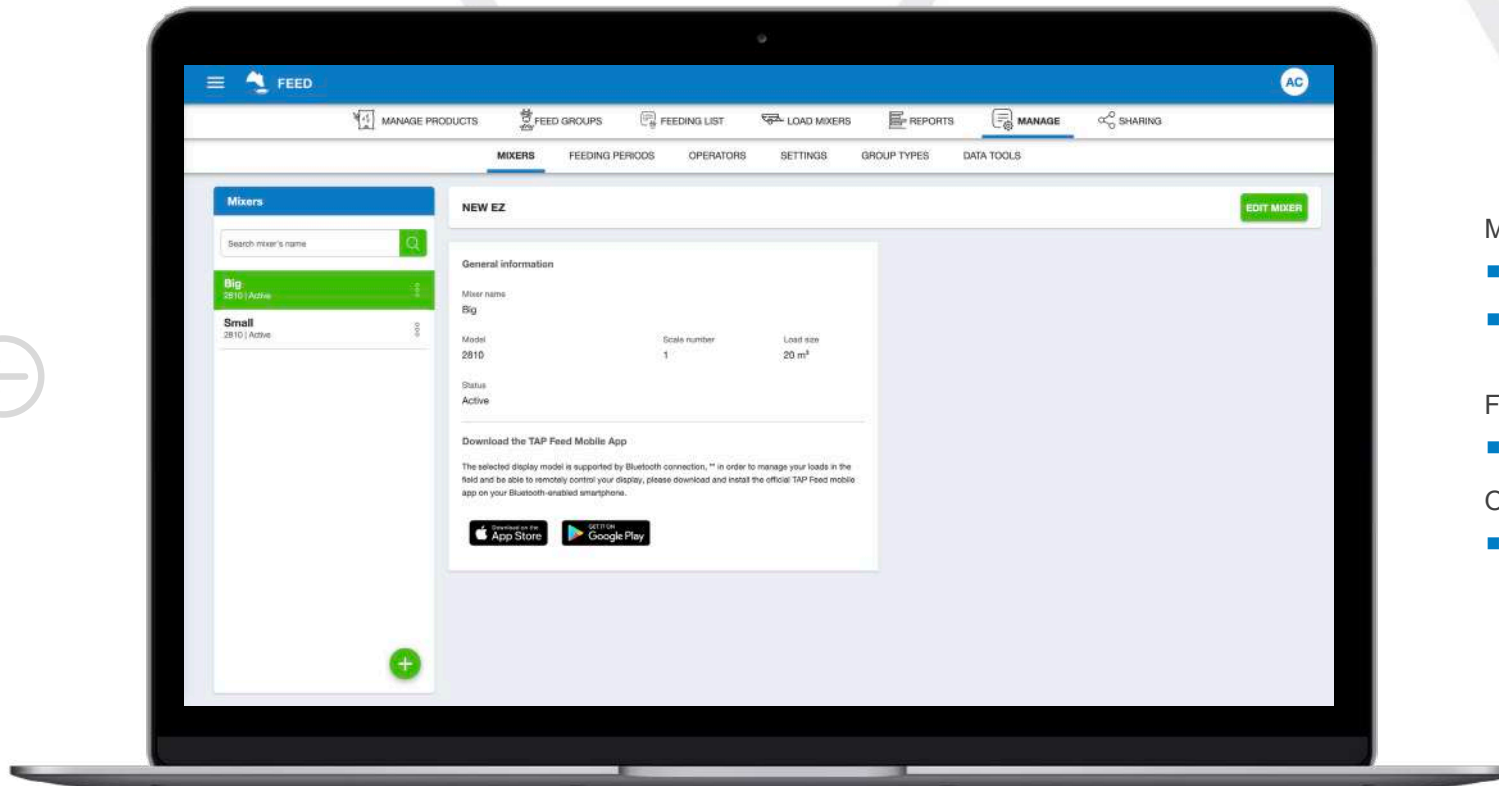

- Ingredients and Premix Usage
- Load Report
- DM Intake Per head
- Ration Delivery
- Group Delivery
- Operator Accuracy

Manage
Manage general feed mixer information, feeding periods and operators.

[Learn More](#)

Mixers

- General information
- Link to FEED App (cab control)

Feeding periods

- Edit names and colors

Operators

- Edit feed mixer operator profiles/names

Settings

- Driver changes / Load Optimization

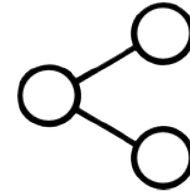

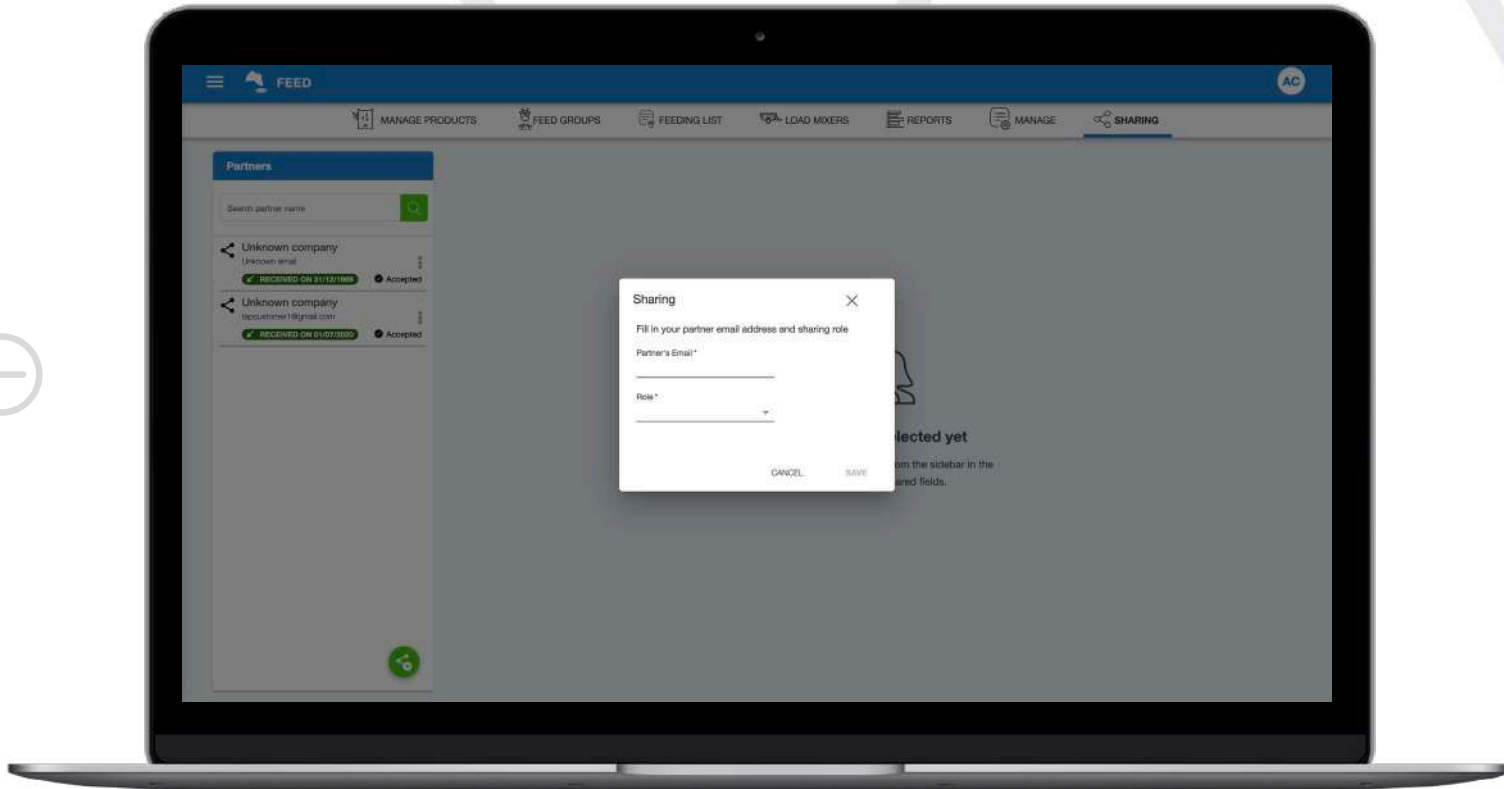

Group Type List

- Name / Group class

Data Tools

- Load & Deliveries / Ingredient prices

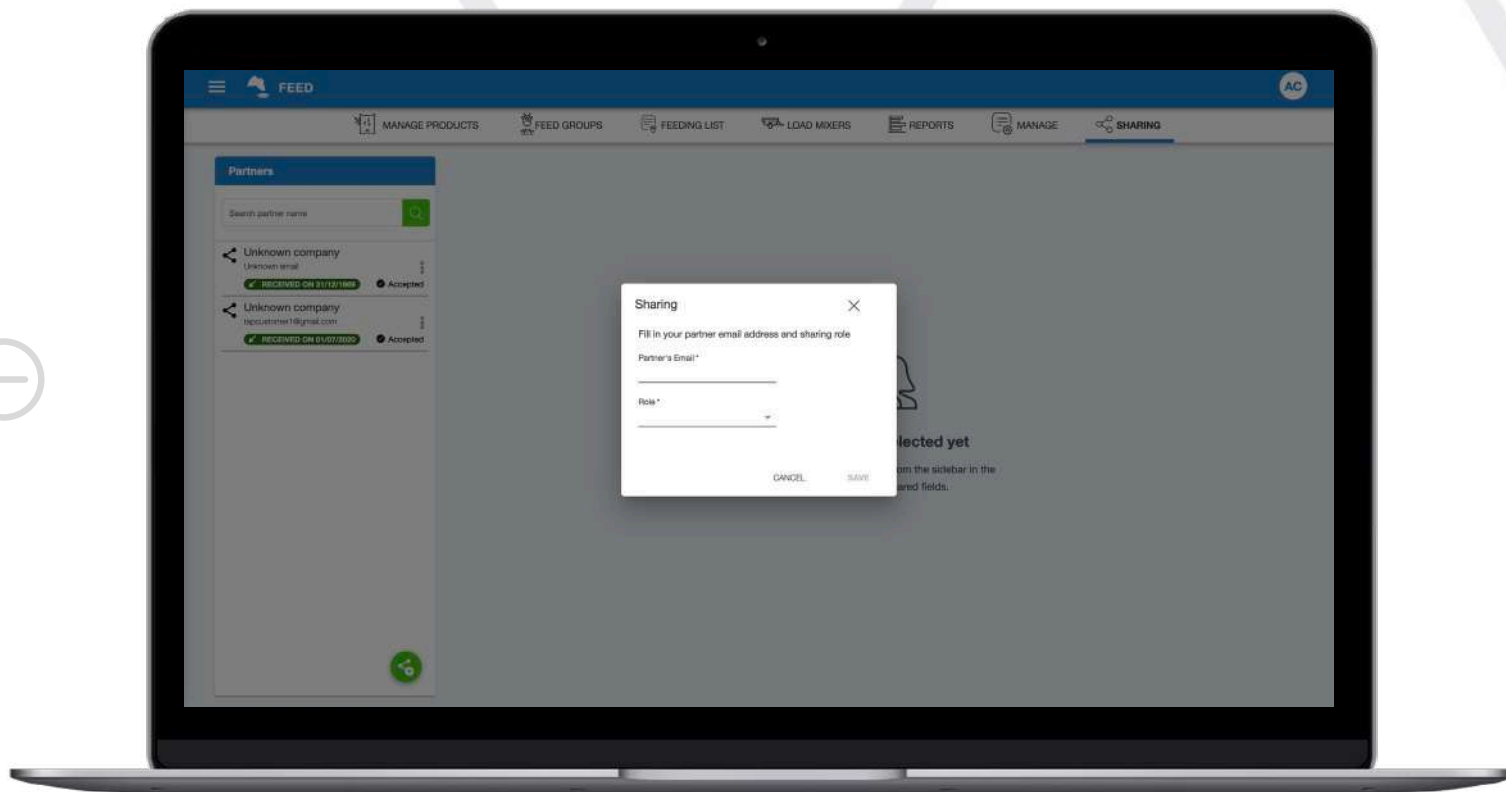

Sharing

Share all or select data with trusted advisors directly through the platform.

[Learn More](#)

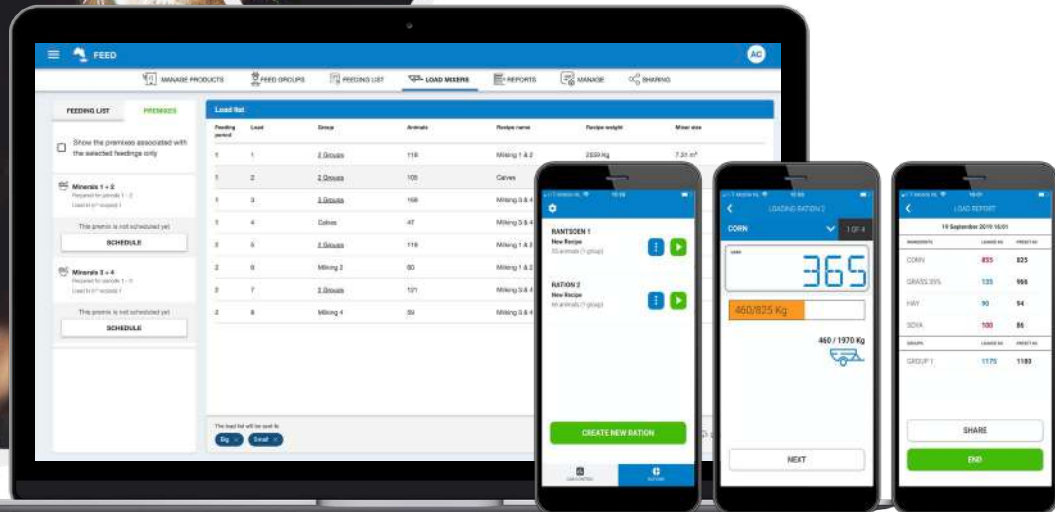

- Search function
- Status updates (Pending/Accepted)
- Remote access
- Revoke access

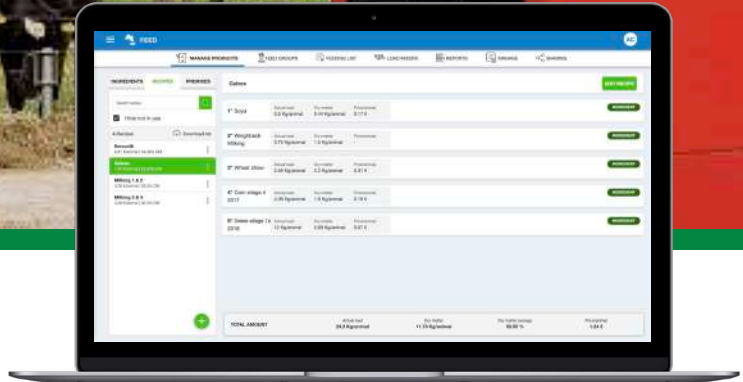

TAP FEED App

Standalone and fully integrated into TAP FEED, offers easy-to-use functionality, including loads, recipes, feeding groups, and an exportable report.

Free with the latest lineup of Bluetooth Digi-Star displays and weigh converters, the app enables an organic transition into feed management for many customers not currently using software.

1

TAP FEED

Feed management software tied directly to load mixers.

2

FEED App

In-cab app to automate data exchange and provide in-cab load display

3

Converter / Indicator

Bluetooth® indicator/convertor on feed mixer acting as controller and display.

4

Load Cells

Integrated load cells for accurate weight measurement
